

Managed WAN Optimization Service

Managed WAN Optimization Service helps customers maintain LAN-like performance for application delivery across WAN for centralized application or data backup. PCCW Global's Managed WAN Optimization Service provides rental, configuration and maintenance on the provided WAN optimizers.

Network diagram

Key benefits to your business

- One-stop-shop hassle-free WAN optimization solution
- Enjoy LAN-like performance for enterprise application while consolidating the application servers and storage systems
- Shorten the data backup time and disaster recovery time
- Free up network management time and reduce expense
- Transparent WAN optimization integration with the networking infrastructure

Specifications

- Vendor neutral solution for different business needs – Riverbed and Cisco are available
- Flexible WAN optimizer platform, e.g. software-only, router-integrated module or dedicated appliance

Features

- Hardware rental, configuration and hardware maintenance
- Overall planning related to network topology design, traffic redirection methods, and Quality of Service (QoS)
- Proactive monitoring by ISO 27001 Certified Network Operation Center (NOC)

Value-Added Services

- Optionally, Satellite link optimization license can be selected for Satellite link WAN usage
